

The Choice for Quality Care

Our Quality Scores are in. We treat you right.

"Quality care means doing the right thing at the right time in the right way – and getting the best possible results. At Weatherford Regional Medical Center, we measure quality with data that's reported on the Hospital Compare Website on a quarterly basis. Below is information found at www.hospitalcompare.hhs.gov comparing WRMC with averages of other area hospitals for measured categories. We're proud that we're doing well and that we can provide quality care close to home."

The Choice for Quality Care

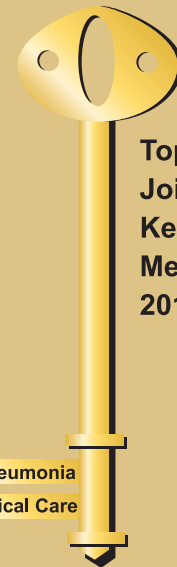

Weatherford Regional Medical Center Holds Top Performer Honors from The Joint Commission

Weatherford Regional Medical Center (WRMC) has received prestigious recognition from The Joint Commission, the leading accrediting body of health care organizations in America.

We place an important emphasis on your hospital experience and the quality of care that you receive while you're a patient with us. This, coupled with the dedication and skill of our physicians, nurses and other clinicians, are what helped WRMC achieve the title of Top Performer on Key Quality Measures.

This recognition was based on data that was reported to The Joint Commission regarding clinical processes that are shown to improve care for certain conditions, including heart attack, heart failure, pneumonia, surgical care and children's asthma. Our hospital met or exceeded the standards of care in the areas of surgical care and pneumonia.

Of the 3,099 hospitals that submitted this data to The Joint Commission in 2010, WRMC is one of only 405 hospitals that received this recognition. We know that when it's you or one of your family members that's the patient, you expect the best care possible, and we will continue striving to meet or exceed those expectations. Thank you for letting us care for you and your family, and thank you for choosing WRMC.
